Name: _____ Company: _____

Phone: _____ E-mail: _____

Job Name & location: _____

1) Please disconnect all power to unit before carefully removing the cover.

2) Please provide the wall sleeve dimensions by measuring from outside edge to outside edge (as show in diagram to the right):

A (Width)= _____ B (Height)= _____ C (Depth)= _____

3) Power connection:

- Wall outlet plug Hardwired armored cable Hardwired electrical sub base

4) Voltage: 115 volt 208/230 volt 265/277 volt

5) Amperage: 15 amp 20 amp 30 amp

6) Heat Style:

- LP / natural gas Heat pump (with electric heat strip) Hot water
 Steam heat Straight cool (with electric heat strip)

*If you selected hot water or steam heat please specify the valve and the voltage below:

Valve: Valve normally open Valve normally closed

Voltage: Line Voltage 115 Volt 24 Volt

7) More information about the unit(s) to be replaced:

Brand: _____

Model #: _____

Minimum circuit ampacity: _____

Approximate age of the unit(s) or serial #: _____

9) BTU Capacity: Cool: _____ Heat: _____

10) Age of the units (or serial number): _____

11) What type of wall construction exists (Ex: glass, masonry, metal frame, wood frame, panel):

12) Wall depth (finished interior to finished exterior): _____

13) How is the unit controlled?

- Unit mounted thermostat Remote wall mount thermostat

14) If a power cord exists, please select it from the following:

NEMA 6-15R

NEMA 6-20R

NEMA 6-30R

(The NEMA 6-30R is the same shape as 6-15R but is larger- with a 2.5" total pin width)
